

Problem Solving Based On DMAIC or 8D or Other Techniques

A Range Of
Training Courses
From 1 to 5 Days
Duration

Identify and Fix Root Causes – Identify and Fix Sources of Variation

The need for problem solving is not likely to disappear soon.

The only question is “how good are we at it ?”

This course teaches participants how to systematically get to the root cause of a problem and fix it.

We can base the training on the popular “DMAIC” technique (our favourite), or on the Ford “8D” method, or on various other methodologies which exist.

Participants will learn how and when to apply a range of powerful yet simple tools in root cause problem solving.

The emphasis is on being creative within a structured framework and we explain why there is no conflict between these two.

“Learned a lot and had great fun !” tends to be the feedback we get from these sessions.

The design of these sessions is highly flexible and can be configured to meet many different objectives.

We like to base this training on practical exercises and we have a range of options to choose from.

A short discussion is all that is required for us to make a proposal to you on a selected configuration of this course.

Comprehensive course manuals are provided.

For more information please contact us.
