

Process Analysis and Improvement

A 1-Day
or 2-Day
Training Course

Beyond Process Mapping !

OK – so you’ve mapped your business process – now what ?

We follow the simple 3-stage rule :-

- Don't collect data unless you are going to analyse it
- Don't analyse data unless you are going to act on it
- Don't act on your analysis unless you are going to measure the impact with data

Mapping a process is a form of data collection (stage 1).

This course goes beyond process mapping and shows participants how to use maps as a starting point to measure, analyse, and improve business processes.

The course is based on extremely practical exercises and the material relates to both transactional and technical processes.

Course manuals are provided.

For more information please contact us.
